Professional Summary

Backend Engineer with 3.9 years of experience building scalable and secure Java microservices for enterprise clients (Working on a client project for a global tech giant via Infosys.). Strong expertise in Java, Spring Boot, Microservices, Keycloak (OAuth2/JWT), REST APIs, Developing unified, reusable API designs that streamline integration across multiple applications, and relational databases. Delivered a reusable Java framework adopted by 40+ internal applications and developed ERP microservices serving 1,000+ employees, ensuring robust authentication and high performance. Core strengths: Microservice design, standardized and reusable API architecture, secure authentication & RBAC, performance optimization, CI/CD automation, and production-grade deployments.

Core Skills & Technologies

- **DSA:** Solved 300+ problems across all platforms (LeetCode, CodeStudio, GeeksforGeeks). Topics covered: Arrays, Strings, Recursion, Trees, Graphs, Dynamic Programming, Sliding Window, Backtracking, Heaps, Tries.
LeetCode: [leetcode profile](#) - 100+
Code360: [code360 profile](#) - 100+ *GeeksforGeeks:* [GeeksforGeeks profile](#) - 100+
- **Languages & Frameworks:** Java, Spring Boot, Spring MVC, Spring Security, Spring Batch, Hibernate/JPA
- **Microservices & APIs:** REST APIs, Eureka, Feign, API Gateway, Spring Cloud Config
- **Security:** Keycloak, OAuth2, JWT, LDAP, RBAC
- **Databases:** PostgreSQL, MySQL, Oracle, MongoDB
- **Deployment & Tools:** Jenkins, Git, Maven, NGINX, Linux (Ubuntu), Mac OS, Splunk
- **CI/CD & Quality:** Jenkins pipelines, SonarQube, Nexus
- **Practices:** Agile/Scrum, HLD/LLD/TAD documentation, code reviews, mentoring
- **Caching, Search and Analytics & Streaming:** Hazelcast, Apache Kafka, Elasticsearch.
- **Cloud:** AWS (EC2, S3, RDS, etc), Kubernetes (POC).

Education

Ajay Binay Institute of Technology, Cuttack, Odisha
Bachelor of Technology in Electrical Engineering Aug 2019 – May 2022
CGPA: 7.5 / 10

Professional Experience

Infosys Ltd Aug 2024 – Present
Associate Consultant (Client: Global Tech Giant)

- Delivered RESTful microservices using Java Spring Boot for large-scale enterprise systems.
- Designed and delivered a reusable Java backend framework adopted by 40+ internal apps, reducing the backend development effort and boilerplate by 90%.
- Automated CI/CD deployments using Jenkins, manual deployments, and supported production releases in Linux-based environments.

- Independently managed end-to-end development lifecycle — requirement analysis → design → development → CI/CD → production support, while collaborating with cross-functional teams.

Enterprise System Solutions Pvt Ltd Apr 2022 – Aug 2024

Associate Developer

- Developed multi-module ERP microservices (Auth, Attendance, PMS, e-Family) using Spring Boot and PostgreSQL; served 1,000+ employees.
- Implemented authentication & RBAC with Spring Security, Keycloak, and LDAP, ensuring secure, auditable access control.
- Managed manual and automated deployments and maintained code quality using SonarQube and CI/CD best practices.
- Created and maintained HLD, LLD, and TAD documentation for internal audits and project compliance, and mentored junior developers to quickly integrate with project technologies and adhere to best-coding practices.

Projects

- **Reusable Java Framework:** Built a reusable backend framework providing generic APIs for CRUD, file upload/download, Excel processing, and database-agnostic service templates. Adopted by 40+ enterprise applications. Enforced standardized design patterns, consistent error handling, async processing, and third-party integrations, significantly reducing boilerplate and development time.
- **ERP System (Multi-module):** Developed a Spring Boot-based ERP with SSO, RBAC, and modular microservices supporting 1,000+ users. Implemented independently deployable modules (Auth, Attendance, PMS, e-Family). Built the Auth service using Spring Security, LDAP, and Keycloak to secure all modules, and contributed APIs across modules while managing the full lifecycle from setup to production deployment.
- **Other PoCs:** **AI-powered Help Desk** with contextual Q&A (Spring AI, OpenAI, VectorDB), Kafka-based **live order tracking**, resilient **microservices suite**, **Hazelcast** caching for 4M+ records, **GraphQL** integration, **real-time chat** using Spring WebSockets, Elasticsearch-based **FAQ bot**, **donation gateway** with Razorpay integration.
